生理:质子泵重点介绍了氢钾ATP酶、氢ATP酶、生物化学中的复合体Ⅰ、ⅠⅠⅠ、Ⅳ

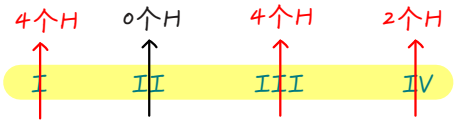

电子传递放能→复合体Ⅰ、ⅠⅠⅠ、Ⅳ将基质的氢泵到膜间隙

建立的氢的势能→H回流到基质放能→合成ATP

每4个H对应一个ATP

$NADH$呼吸链:$(4H+4H+2H)/4=2.5ATP$

$FADH_2$呼吸链:$(0H+4H+2H)/4=1.5ATP$
